

Exceptional Image Quality
in a Smaller Design

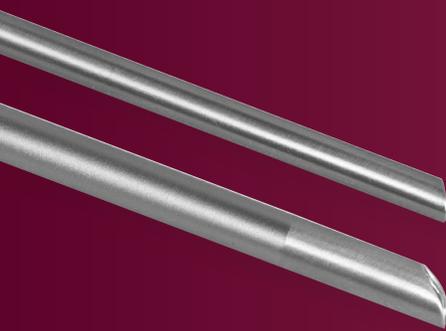

3.8 Compact Hysteroscope

Slim 3.8 mm outer diameter
for less dilation

3.8 mm Compact Hysteroscope

features increased patient comfort, enhanced durability, and effortless design while maintaining excellent image quality.

- Approximately 30% thinner than comparable hysteroscopes
- Slim 3.8 mm outer diameter requires less dilation than conventional hysteroscopes
- Rod lens optics system offers superior image quality over flexible and rigid fiber optic scopes
- 5 Fr. working channel accommodates a larger range of instruments for expanded treatment options
- Dedicated inflow and outflow channels maintain distention and visibility throughout the entire procedure

Hysteroscopes				
Catalog Number	Outer Diameter	Viewing Angle	Working Channel	Working Length
8986402	3.8 mm	30°	5 Fr.	217 mm
8986.401	5 mm	20°	5 Fr.	217 mm
HySafe Qui-Connect Modular Forceps, Rotatable				
Catalog Number	Description			
8642.6002	HySafe spoon biopsy forcep, 5 Fr., 340 mm WL
